## Investment Objective and Investment Policy

The investment objective of the fund is to generate value from a worldwide, diversified portfolio of equity.

The investment strategy is based on a value-style fundamental review of company performance. Risk diversification and liquidity are always fully considered.

## Characteristics

The fund is suitable for long-term oriented investors, who prefer to invest in a globally diversified equity portfolio and would like to delegate the tactical asset allocation to the fund manager.

## Investment Manager's Comment

The fund lagged slightly in October, mainly due to our numerous investments in emerging markets. The stronger US dollar led investors to sell off Brazil and Mexico. With Qualitas Controladora, we bought a position in Mexico's largest car insurer, which boasts high returns on capital and growth rates, following a steep drop in its stock price. Standard Bank, a new position in South Africa, is the market leader in many sub-Saharan countries and highly profitable due to a lack of competition. B&M European Value Retail is a very attractively valued and growing discount retailer operating in the UK and France. We sold our shares in the US health insurers Cigna and Humana: exploding costs coupled with regulatory restrictions on premium growth meant that we had to revise our fair value estimates significantly downwards.
