52 Week Low	USD	119.46
Total Assets in mn	USD	580.45 (all classes of the fund)
Number of Shares		126'504

## Investment Objective and Investment Policy

The objective of the fund is to achieve a reasonable and inflation-resistant return over the medium to long term through a broadly diversified portfolio of equities, commodities, bonds and money market instruments. To reduce risk, large individual bets are avoided and the portfolio is regularly rebalanced.

## Characteristics

The fund is suitable for investors with a medium risk tolerance who are looking for long-term participation in the equity and commodity markets as well as inflation protection through real assets.

## Investment Manager's Comment

The major trends of 2024 continued in December. On the equity side, there was nothing for the fund to gain in relative terms, as we were not involved in the roaring US tech rally. Our equity investments focus is more on defensive quality stocks and emerging markets. On the other hand, we performed very positively with gold and commodity futures and once again avoided losses on the fixed-income side thanks to our focus on the short end of the yield curve. We were able to buy another quality stock, Nestlé, at a very fair price, as hardly any investors are still interested in such defensive stocks. This alone is another warning sign that the euphoria on the US tech market could soon come to an end.
