52 Week Low	CHF	205.76
Total Assets in mn	CHF	132.15 (all classes of the fund)
Number of Shares		123'007

## Investment Objective and Investment Policy

The Investment fund invests in gold and silver, as well as in companies involved in drilling, mining and marketing in the precious metals industry. Foreign currency exposures against Swiss Franc could be hedged.

## Characteristics

Due to its balanced structure, the fund offers a combination of stability and growth potential in a world of increasing tensions, economically and politically. It is therefore the suitable investment vehicle for long-term investors.

## Investment Manager's Comment

The strong dollar dampened the mood somewhat at the end of the year, but on balance it was a very good year for gold and gold mining shares. The fund also performed well in relative terms over the year. The biggest disappointment was probably the lack of leverage of the mines to the rising gold price. The correlation is not always strictly linear, but fluctuates with the whims of investors. Speculators were certainly more focused on tech stocks than gold explorers in 2024.

The takeover bid from Northern Star for our large position in De Grey at a considerable premium was a welcome performance boost at the end of the year. We subsequently sold our position in Northern Star and reduced De Grey. As replacement, we bought Sandstorm and Elemental Altus, two more royalty companies with very attractive valuations. The new addition Southern Cross Gold has an interesting new gold deposit in Australia.

Market data (Quantex, Bloomberg) of December 30, 2024

## Net Asset Value in CHF

## Net Performance in CHF (fund after fees, index without fees)

	Dec 24	YTD	1 Year	5 Years	10 Years	Incept.*
