Investment Objective and Investment Policy

The Investment fund invests in gold and silver, as well as in companies involved in drilling, mining and marketing in the precious metals industry.

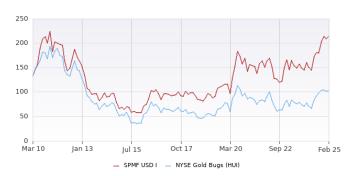

Characteristics

Due to its balanced structure, the fund offers a combination of stability and growth potential in a world of increasing tensions, economically and politically. It is therefore the suitable investment vehicle for long-term investors.

Investment Manager's Comment

The gold sector corrected in February and the fund was able to demonstrate its defensive qualities. The out-of-control fiscal deficits in most Western countries remain supportive for precious metals. Many mining stocks are still attractively valued. With Aya Gold&Silver and Abra Silver, we bought two new stocks with promising projects with high metal grades. We sold our small position in Cerrado Gold, as the company has diversified into the development of a large iron ore project and is therefore no longer in line with our precious metal focus.
